

Mabuhay! Welcome to Dolores, Quezon! Being on the web will provide investors and prospectors access to investment opportunities and potentials to determine the kind of business or investment venture they could embark based on the informations available. For research purposes, site visitors can come to know Dolores better informed of the significant informations particularly the local government services, affairs, priority undertakings, development updates, accomplishments, announcements and best assets of our town. With this noble IT endeavor, we can now transmit accurate, timely and comprehensive information and services about local government's affairs directly to our constituency mostly Dolores residents who are outside the region and country eager to hear news and updates about the municipality.

With this positive development, LGU officials and employees are confident and highly motivated to work even harder and look for more innovative ways to continuously improve and upgrade our site to make it even more responsive and dynamic not only to the needs of our constituents but to visitors from other parts of the country and the outside world as well.

I hope and pray that this web presence will keep us united and more inspired making Dolores awake amid of our development challenges, successes, trials and resources.

Renato Alilio Sr., MD. Mayor
